VIRTUAL SERVICES PRESENTATION

BACKSTAGE HEALTH, LLC

Our Mission

"To Help Exceptional Schools, Help Exceptional kids"

ABOUT US

Credential School Nurse Services

We have a team of Credentialed School Nurses who provide virtual CSN services to public and non-public schools in California.

Among our Virtual Services:

IEP meetings

504 Plans

Health Team
Supervision

Virtual Vision & Hearing Program

Via Hybrid Telehealth

In-campus equipment, fully controlled by our virtual Credentialed School Nurse, allows for vision and hearing screening via Hybrid Telehealth.

1

Vision Screenings

We utilize a Digital Vision Acuity Testing Software to perform distance and near vision screenings via tele-health. CSN has full remote control of the digital optotype, being able to change the display and distance settings, as well as randomize the letters at any time.

2

Hearing Screenings

We utilize a state-of-the-art audiometer to make our tele-health hearing screenings possible. It remains the same concept for students; "press the button when you hear the sound". CSN has complete remote control of the audiometer settings, being able to screen at the required frequencies and change screening settings as needed.

All equipment to be returned at the end of services agreement.

OUR PRICE

Simple Pricing
