

TELEHEALTH VISION AND HEARING SCREENINGS

Backstage Health is a California NPA-certified provider partnering with schools statewide to deliver virtual care through Credentialed School Nurses. Our hybrid telehealth model enables compliant vision and hearing screenings using campus-delivered equipment kits guided by remote nurses for a seamless experience.

EQUIPMENT

We will deliver a complete equipment kit to your school site. Simply establish a Wi-Fi connection, and you're ready to start screening.

VISION

We use advanced Vision Acuity Optotype Software to perform both distance and near vision screenings. Our remote Credentialed School Nurse (CSN) has full control of the digital optotype, with the ability to adjust display settings, modify testing distance, and randomize letters in real time.

HEARING

We use a Type 4 Pure Tone Audiometer to conduct hearing screenings through a hybrid telehealth model.

Our remote Credentialed School Nurse manages the screening process in real time, with full control over the audiometer settings—ensuring screenings are delivered at the correct frequencies and adjusted as needed for accuracy.

The process is simple for students: “Press the button when you hear a sound.”

SIMPLE PRICING

We're pleased to offer our virtual services with flexible scheduling options, starting at just 10–15 hours per week per nurse. Services are billed at \$135 per hour. A one-time, non-refundable equipment fee of \$2,500 covers the complete vision and hearing screening kit delivered to your site. All equipment remains the property of Backstage Health and must be returned at the conclusion of services.
